

# TRUDELL HEALTHCARE SOLUTIONS

Trudell Healthcare Solutions (THS) would like to highlight the dedication and efforts of the members of the RTSO on their commitment to treating and supporting patients during the COVID-19 pandemic.

## Featured Solutions:

### Closed Suction System

Designed for the removal of bronchial secretions, both endotracheal and tracheostomy configurations are available.

Sizes Include: 10Fr, 12Fr, 14Fr, 16Fr, 18Fr

### Serres Suction System

Consists of disposable suction bags, reusable suction canisters and a wide range of accessories. This closed system eliminates contact with collected blood and fluids, and secure closing ensures no spillage or leakage occurs.

Suction bags and canisters are offered in 1000ml, 2000ml or 3000ml sizes.

Pre-Gelled Suction Bag

Folded Suction Bag

Reusable Canister

## TRUDELL MEDICAL INTERNATIONAL

Aerobika® OPEP device opens weak or collapsed airways by simultaneously creating positive pressure and oscillations to help thin, shear and move mucus to the upper airways where it can be coughed out by the patient.

\*Can be used with all commonly prescribed Meter Dose Inhalers  
\*Single Patient Use

Comfort Seal\* Mask (on mask models)

THS is committed to supporting RTs and hospitals with the products needed to help manage COVID-19 patients and help staff deliver the best patient care. #patientcare #COVID-19 #healthcaresolutions
